Information Resources and Library Science Undergraduate Minor

School of Information Resources and Library Science

Undergraduate Minor in Information Resources and Library Science with an emphasis on Digital Information Studies

Rationale

The shift from analog to digital information and media that began in the middle of the 20th century has profoundly affected the way we make friends, transact deals, discover new things, share stuff, and create our identities. The Undergraduate Minor in **Information Resources and Library Science (IRLS) with a focus in Digital Information Studies** provides a way to learn about and critically evaluate the issues that confront us as citizens of the digital age. Students who complete the minor are better prepared to enter workplaces in need of people with a broad and nuanced understanding of the **practical and theoretical implications of intangible information**. The University of Arizona School of Information Resources and Library Science (SIRLS) hosts the minor and provides advising for undergraduate students in the minor.
